PRESS RELEASE

Vantage Continues Commitment to Naturally Derived Ingredients
New Product to Launch in October
October 18, 2017

Vantage Specialty Ingredients, Inc. continues its commitment to providing *Naturally Better Solutions™* to the personal care market with the development and launch of its first Bio-Ethylene Oxide based product for use in personal care. Developing more sustainably produced raw materials is one of Vantage's major strategies for future growth. With this new Bio-Based feedstock, the company has taken one of its key, proven ingredients and developed a green, non-petroleum based, and truly sustainably produced ingredient.

"Continuing with our strategy to develop more sustainable ingredients, this launch further signifies our commitment to our Green and Sustainable Platform of product development." said Patrick Brueggman, Senior Vice President & General Manager at Vantage. Vantage is dedicated to using sustainable and socially responsible practices across all business units, affirming its promise to being a reliable global supplier.

Liponic® Bio-EG-1 is a sustainably produced multi-functional ingredient derived from natural and sustainable feedstocks. RSPO grade glycerin and ethylene oxide that is derived from corn ethanol are utilized to produce this material. Vantage will be launching Liponic® Bio EG-1 (Glycereth-26) to the market in late October 2017.
